## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Allowable Subject Matter***

2. Claims 1-18 are allowed.
3. The following is an examiner's statement of reasons for allowance: The present invention comprises a display device. The closest prior art, Shimura et al. (US 5,677,705), teaches a liquid crystal [Fig. 1, 32] between a first substrate provided with row/selection electrodes [Fig. 1, 29-31] and a second substrate provided with column/data electrodes [Fig. 1, 23-25], the row electrodes and the column electrodes overlapping to define pixels; column drive means [Fig. 1, 22] for driving the column electrodes in conformity with an image to be displayed; and row drive means [Fig. 1, 28] for driving the row electrodes which, in the operating condition, sequentially supply groups of p row electrodes with p mutually orthogonal signals [Fig. 5,  $\phi(1) - \phi(8)$ ], wherein the mutually orthogonal signals are pulses having four elementary units of time [Fig. 5, t], within which four elementary units of time one pulse each time has a first (i.e. 1, for instance) polarity which opposes a second (i.e. -1, for instance) polarity of the other pulses (see Column 1, Line 39 - Column 5, Line 60).

Art Unit: 2673

However, Shimura does not expressly disclose the mutually orthogonal signals are pulses *obtained from at least two types of orthogonal functions* having four elementary units of time, within which four elementary units of time one pulse each time has a first polarity which opposes a second polarity of the other pulses. Such distinct orthogonal waveform pulse derivation described above has been incorporated into both pending independent claims, thereby rendering them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeff Piziali whose telephone number is (703) 305-8382. The examiner can normally be reached on Monday - Friday (6:30AM - 3PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin Shalwala can be reached on (703) 305-4938. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
